

## Full Control. Real-Time Protection.

TruGuard helps businesses protect, track, and manage high-value assets with reliable, commercial-grade technology built for real-world operations.

### When Visibility Isn't Enough, Take Control

TruGuard XP delivers maximum control over powered assets with real-time tracking, advanced alerts, and optional remote disablement, giving businesses the ability to actively manage and protect critical equipment.

#### Reliable GPS Tracking

TruGuard XP provides unlimited pin-point GPS locates with the click of a button. Stay connected to your assets and know their precise location.

#### Remote Asset Disable

TruGuard XP has an optional remote asset disablement feature that adds additional protection with the ability to prevent an asset from operating in the event of a theft.

#### Internal Back-Up Battery

TruGuard XP features an internal back-up battery to provide up to 21 hours of continued operation, alerts, and location data when external power is lost.

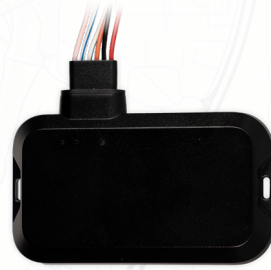

#### Waterproof & Dust Tight

TruGuard XP is IP 66 & 68 certified which means it's dust-tight, waterproof\*, and protected against forceful water spray, giving it the rugged durability needed to be used in all types of environments.

\*Protection from continuous immersion in water for up to 6ft depth for 60 minutes.

# Multiple Installation Options

TruGuard XP has multiple installation options providing flexibility and functionality for various uses.

## Basic Tracking

Two-wire (power & ground) configuration for basic tracking and standard device features.

## Remote Disable

Five-wire configuration for optional remote disable and ignition monitoring can be added to basic tracking and standard device features.

## Door Lock/Unlock

Additional door lock/unlock relay signal wires can be configured (with or without remote disable).
