

Rugged Tracking for Real-World Conditions

TruGuard helps businesses protect, track, and manage high-value assets with reliable, commercial-grade technology built for real-world operations.

Wireless Tracking Built for the Toughest Environments

TruGuard HD is a rugged, self-powered tracking solution engineered for heavy-duty environments, delivering reliable asset protection and visibility where other devices fail.

Rugged & Tough Design

Made for rugged environments, our toughest tracking device ever, TruGuard HD features an armored shell protected against incidental impact with an IK08 rating.

Advanced Tamper Detection

TruGuard HD includes advanced tamper detection, notifying you anytime the device is removed from its mounting surface, giving you warning of tampering or installation issues.

Integrated Mounting Options

TruGuard HD comes equipped with built-in magnets with over 50 pounds of magnetic force as well as integrated screw/rivet mount holes to support placement on numerous asset types and locations.

Waterproof & Dust Tight

TruGuard HD is IP69K certified, the highest IP rating possible, which means it's dust-tight, waterproof*, and protected against forceful high temperature water spray, giving it the rugged durability needed to be used in all types of environments.

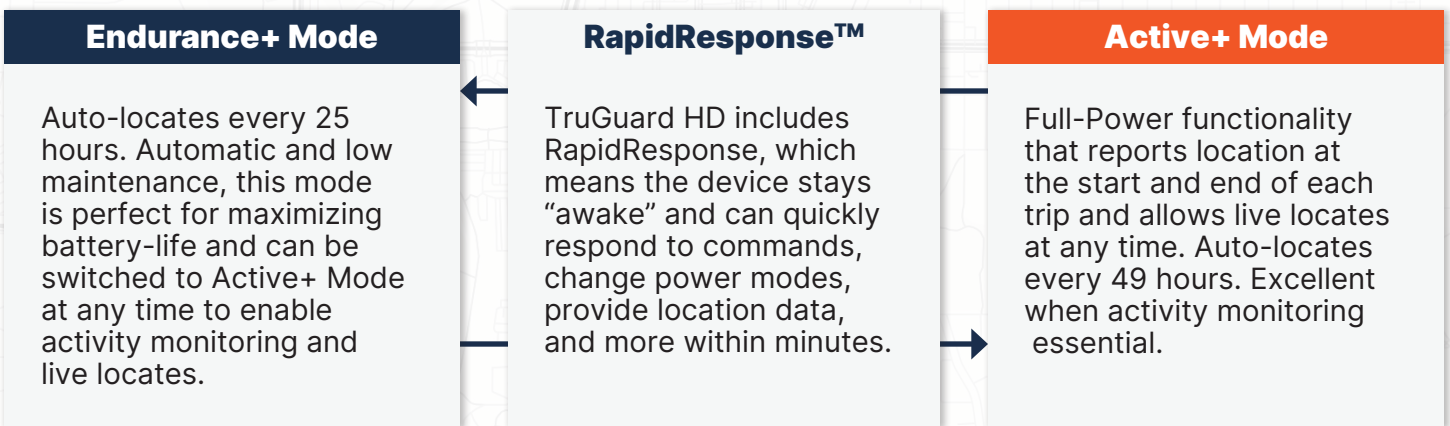

*Protection from continuous immersion in water as much as 10ft depth for several hours.

Device Features

-  **Reliable Location Tracking**
-  **Beyond GPS+™**
-  **RapidResponse™**
-  **Up to 10+ Years Battery Life**
-  **One-Step Activation**
-  **No Installation Required**
-  **4G/5G Compatible Network**
-  **Geofences**
-  **Field Replaceable Battery**

Flexible Power Modes

Switch between two different Power Modes for ultimate flexibility in balancing the features you want with the battery life you need.
